

The National Leader in Automated MIPS Reporting

As a CEHRT, Health eFilings ONC Certified software tracks and reports Quality measure data to optimize MIPS points so Clinicians avoid significant penalties and maximize reimbursements

ONC Certified software does all the work with no IT or Administrative support required from the practice

Benchmarking performed using CMS database for 100% accuracy

Software extracts data from any EHR or billing system - no need for manual chart abstraction

Software is certified to calculate all Quality measures and proprietary algorithms assess 9 million combinations of measures to maximize MIPS points

End-to-end electronic MIPS reporting for all Specialties for all categories: Quality, Promoting Interoperability, Improvement Activities

Software automatically determines if Individual or Group reporting optimizes MIPS Composite Performance Score (CPS) and submits electronic file directly to CMS

CEHRT reporting of eQMs earns significantly more points than Registry measures

Customizable and interactive dashboard with drill-down from the Facility to Clinician to Patient level for actionable insights

Is the only service that can integrate data across multiple platforms to create a comprehensive, de-duplicated patient record

Utilize MIPS CPS Calculator to generate a real-time score and track impact of performance improvements

100% of Health eFilings' submissions accepted by CMS

Live support from dedicated MIPS Account Specialists provide guidance and advice to manage all elements of MIPS reporting
